Other varieties occasionally available, please inquire.

An aristocrat among the shade-loving plants, the Hosta is adaptable to so many uses in the garden and landscape plantings. It is an ideal border and ground cover plant. The varied shades of foliage make it the perfect accent plant. The wide range of shades and sizes of leaves offers much to the imagination of the garden designer. Although most Hosta do best in partial shade, some will tolerate an amazing amount of direct sun. Also, a fair amount of sun is required if the gold varieties are to attain the best colour. Hosta will grow in a variety of soil conditions but are grateful for the addition of compost and manure.

During extended periods of drought, Hosta need additional moisture if they are to attain full growth. Good drainage is also beneficial. This extremely hardy group of plants is troubled by few pests and plant diseases. Humber Nurseries is pleased to present to you over 240 varieties for 2010.

GOLD MARGINED HOSTA Included here are cream, creamy-white as well as gold margined. Some types are truly gold margined in spring becoming more white in summer. Best colour is achieved in good light with shade in the late afternoon.

SUN TOLERANT HOSTA?

This is a frequently asked question that has several answers. The worst sun damage to hosta comes in high summer from 11:00 am to 4:00 pm. Many people agree that hosta lose a lot of moisture content from sun and wind. So, water profusely and keep them heavily mulched. Thick leaved and fragrant hosta with plenty of water will also tolerate sun conditions better than other hosta.

There is no such thing as a truly sun-tolerant hosta. In Zone 6 and above, hosta should remain in some shade, as the sun is much too intense. In northern gardens, the closest is Hosta 'Sum and Substance', though not for a full day in mid-summer. You must give this one a lot of sun in order to get the good bronze-gold look.

All Hosta varieties carry our 100% Two Year Guarantee, except when planted in containers. This guarantee is extended to three years when the plant material is installed by Humber Nurseries Landscaping Inc.

GREEN/BLUE MARGINED HOSTA Many uniquely coloured hosta can be included here with margins of green or blue-green. The criteria being that the leaf centre is of a lighter colour than the edges. Some have a remarkable combination of colours with streaking in the centre.
