# 2010 PRICE LIST

## BROADLEAVED EVERGREENS

All Broadleaved Evergreens carry our 100% Two Year Guarantee, except where noted or when planted in containers. This guarantee is extended to three years when plant material is installed by Humber Nurseries Landscaping Inc.

For further information pick up Green Thumb Guides GT 221 Hedges, GT 226B Ground Covers, **PL 902**  
 GT 222 Rhododendrons & Azaleas, GT 310 Shade Gardening, GT 340 Plant Hardiness Zones **Effective March 1, 2010**

### AZALEA HYBRIDS

Azaleas provide brilliant displays of colour in late May and require little care. They grow best in rich, well-drained acid soil. Part shade, light filtered shade or high open shade are preferable.

#### Evergreen Azaleas

(100-125 cm) Zone 6  
 Rich dark green foliage in spring and summer becoming tinged with shades of red, yellow or purple in fall and winter. The foliage of evergreen azaleas requires protection from winter sun and wind. No guarantee over winter.

- |                         |             |                 |
|-------------------------|-------------|-----------------|

| 2 gal.....34.99         |             |                 |

#### Deciduous Azaleas

(125 cm) Zone 6  
 These varieties lose their leaves in autumn and consequently are more tolerant of winter conditions. Protection from winter sun and wind is still recommended. No guarantee over winter.

- |                           |            |                 |

### RHODODENDRON HYBRIDS

Rhododendrons are one of the most spectacular flowering plants and provide brilliant displays of colour in late spring. They require rich acid soil, protection from sweeping winds and **EXCELLENT DRAINAGE**. Part shade, light filtered shade or high open shade are preferable. Avoid intense sunlight - morning sun is preferable to afternoon sun. Protect the foliage in winter from drying winds and sun. Burlap or 'anti-desiccant' sprays are suitable for this purpose. Pine needles, oak leaves and evergreen boughs provide additional protection.

#### Dwarf Lepidote (Small Leaved) Rhododendron Hybrids

(60 cm) Zone 5  
 Ideal for rock gardens, these hardy hybrids have low rounded form, small neat foliage and showy spring flowers. 100% two year guarantee.

- |                  |        |                 |
|------------------|--------|-----------------|
| <b>Impeditum</b> | purple | <b>#RHOHBIM</b> |
| 2 gal.....49.99  |        |                 |

#### Lepidote (Small Leaved) Rhododendron Hybrids

(125-150 cm) Zone 5  
 These hybrids have small leaves, usually less than 10 cm, which are scaly and often with a distinct spicy fragrance. Hardier and more compact than elepidote rhododendrons and bloom earlier. Dark green leaves becoming rich mahogany-purple in fall and winter. Very floriferous and easy to grow. 100% two year guarantee.

Clipped pyramidal form....70 cm....94.99  
Clipped globe form.....50 cm....69.99

**Bunchberry #CORCA**  
*Cornus canadensis* (15 cm) Zone 3  
Beautiful native semi-evergreen ground cover spreading 60 cm. White flowers in spring followed by bright red edible fruit. Reddish-green foliage in spring becoming dark green in summer and then red to purple in fall and winter. Best in rich cool moist acid soil.

4" pot.....5.99 1 gal.....14.99

**Heather #CALVU**  
*Calluna vulgaris* (60 cm spread) Zone 5  
Evergreen ground cover 10 to 40 cm tall. White, pink, purple or red flowers in late summer. Avoid windy sites, drought and over-fertilizing. Use 100% peat moss as a growing medium.

1 gal.....16.99

## COTONEASTER

A plant for all seasons. Pinkish-white flowers in spring and inedible striking red fruit in fall often persisting into winter. Deciduous varieties show excellent bronze to red-purple fall colouration while evergreen varieties maintain glossy dark green foliage for most of the year. Excellent for ground cover, masses, slopes, rock gardens, shrub borders or as a low specimen shrub. Also available in tree form.

**Tom Thumb Cotoneaster #COTAPT**  
*Cotoneaster apiculatus 'Tom Thumb'* (35 cm) Zone 5

Delightful newer variety with dense compact mounding form spreading to 125 cm. White flowers in spring followed by red berries. Lustrous dark green foliage turning red in fall. Deciduous.

2 gal.....19.99

**Cranberry Cotoneaster #COTAP**

*Cotoneaster apiculatus* (100 cm) Zone 4  
Spreads to 125 cm. Pink-white flowers in spring followed by large bright red berries. Shiny green leaves turn bright red in fall. Deciduous.

1 gal.....14.99 3 gal.....24.99

Tree form.....79.99

**Bearberry Cotoneaster #COTDA**

*Cotoneaster dammeri* (15 cm) Zone 4  
Excellent semi-evergreen creeping ground cover spreading 100-125 cm. Dark green glossy oval foliage. White flowers in spring followed by red berries in fall.

1 gal.....14.99 2 gal.....19.99

Phone: 1-800-400-2255  
Fax: 1-800-400-8876

**EUONYMUS**

*Euonymus fortunei*

Sturdy evergreen ideal for foundation planting, ground cover, medium height hedge or accent plant. Most require full sun to part shade with some varieties tolerating full shade. Will climb if supported. Not all varieties available in all sizes. Prices may vary.

1 gal.....12.99 3 gal.....29.99

Also available in tree form.....69.99-169.99

**Canadale Gold** #EUOFOCA  
(100 cm) Zone 5

Bright green-gold variegated foliage.

**Emerald Gaiety** #EUOFOGA  
(100 cm) Zone 5

Striking green leaves edged in silver. Particularly showy in shady locations.

**Emerald 'N Gold** #EUOFOEG  
(90 cm) Zone 5

Bright green and gold variety that adopts a pink tinge in winter.

**Gold Tip** #EUOFOGT  
(100 cm) Zone 5

Deep green leaves marked with gold.

**Purple Winter Creeper** #EUOFOCO  
*E. 'Coloratus'* (40 cm) Zone 5

Can be used as a ground cover or climbing vine. Green foliage turns deep purple-red in fall. 2 m spread.

**Sarcoie** #EUOFOFA  
(100 cm) Zone 5

Lustrous dark green foliage all year in sun or shade.

**Sheridan Gold** #EUOFOFH  
(100 cm) Zone 5

The new foliage at the branch tips is brilliant golden-yellow. Mature foliage is dark green.

**Sungold** #EUOFOSG  
(90 cm) Zone 5

Bright gold-green variegated foliage. Very showy.

**Surespot** #EUOFOFU  
(60 cm) Zone 5

Bright yellow foliage with dark green edges.

**Wintergreen** #GAUPR  
*Gaultheria procumbens* (15 cm) Zone 4

Beautiful native evergreen ground cover spreading 60-90 cm. Pinkish-white flowers in spring followed by bright red edible fruit. Reddish-green foliage in spring becoming dark green in summer and then purple in fall and winter. Foliage is edible and the source of wintergreen oil. Best in rich moist acid soil.

4" pot.....5.99 1 gal.....14.99

**Yellow Broom** #GENLY

*Genista lydia* (60 cm) Zone 6  
Mounding spreading evergreen with slender arching stems. Golden-yellow flowers in spring. Ideal for ground cover or cascading over walls. No guarantee over winter.

1 gal.....21.99

**Vancouver Golden Broom** #GENPIVG  
*Genista pilosa* 'Vancouver Gold'

(100 cm) Zone 6  
Low spreading ground cover. Grey green arching stems and yellow flowers in May-June. No guarantee over winter.

1 gal.....21.99

**English (Baltic) Ivy** #HEDHEBA  
*Hedera helix* 'Baltica' (5 m) Zone 5

Valued for winter-persistent foliage and ability to thrive in deep shade. Also makes an excellent evergreen ground cover. As a vine it is self-clinging but needs a year or two to establish a good root system before starting to climb.

1 gal..(unstaked)...11.99 1 gal..(staked)..16.99  
2 gal.....22.99

**HOLLY**

**Blue Holly**

*Ilex meserveae* (2 m) Zone 5  
Superior breeds permit the northern gardener to grow the glossy-leaved, heavily berried English type of holly. Male and female plants required for fruit production. 2 m wide

**Blue Prince** male, pollinator #ILEMBP  
**Blue Princess** female, red berries #ILEMEPR

3 gal.....42.99

**Royalty Combination** #ILEMERO

Blue Prince & Princess together in the same pot ensures pollination and bright red berries.

3 gal.....59.99

**Shamrock Inkberry** #ILEGLSH

## YUCCA

Excellent in hot dry areas, this unique clump-forming evergreen with long narrow spiky leaves reminds one of Mexico or the southwestern desert. It quickly becomes the focal point of the garden with its large spikes of fragrant white flowers in summer. Blooms often visited by hummingbirds. Useful to add interest or focus in flower beds.

**Adam's Needle** #YUCFI  
*Yucca filamentosa* (100 cm) Zone 4  
Creamy white flowers on tall spikes in July-August. Green sword-like leaves. Native.

3 gal.....24.99

Varieties available:

**Bright Edge** #YUCFIBE  
(80 cm) Zone 4. Green leaves edge with bright gold

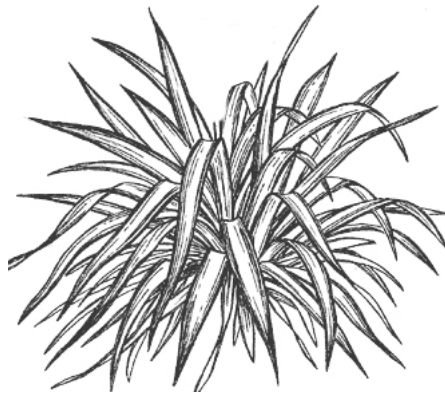

2 gal.....32.99

**Colour Guard** #YUCFIGG  
(80 cm) Zone 4. Green leaves with yellow centres

2 gal.....32.99

**Golden Sword** #YUCFIGS  
(100 cm) Zone 4 Rich yellow leaves with green margin.

3 gal.....34.99

For Landscape Design Services see our flyer no. GM1105

## FOR PLANT INSURANCE USE C.I.L. PLANT STARTER

- A starter fertilizer and rooting hormone.
- Encourages root development
- Reduces transplant shock
- Makes 58 litres of solution

## WINTERIZING EVERGREENS

Most evergreens are completely hardy and need little winter protection. The exceptions are Dwarf Alberta Spruce and broadleaved evergreens such as Rhododendrons as these plants are susceptible to sunburn. We recommend you wrap these plants in late fall with burlap (do not use plastic) to shade them from sun, which is strongest in southern and western exposures. The same applies to newly planted upright evergreens which have had no chance to establish deep roots. By wrapping them you will prevent winter damage due to dehydration. Thoroughly watering evergreens before the onset of winter is essential.

Most winter damage is not caused by cold, but by wind and sun in later winter when the soil is deeply frozen. For this reason the best way to protect plants such as Rhododendrons is first by applying a 20 cm mulch over the roots and second by creating a barrier with burlap to keep out wind and sun. Application of an anti-desiccant also affords protection.

Upright evergreens are often damaged by heavy snowfall and ice. To prevent this there are special nettings available which will hold the branches tight and prevent winter damage (see illustration).

## Vantage Wrap

Protects your evergreens and shrubs from freezing rain and heavy snowfalls. Easy to apply, easy to store, reusable year after year.
